

# Meet your implementation timeline

Is your association facing a time crunch because of an impending technology renewal date? Is your organization looking for more robust functionality right away?

Regardless of your association's timeline or specific organizational needs, NetForum AMS has your implementation requirements covered!

Here's how:

## Optimized adoption

Should you choose NetForum's optimized adoption?

**Optimized adoption** is perfect for mid-to-large sized organizations who have outgrown their current AMS.

Optimized adoption makes it easy to onboard quickly with NetForum's out-of-the-box features to maximize revenue, save staff time, and enhance the member experience.

As your organization grows and expands member value, you can take advantage of NetForum's additional enterprise-level functionality.

Learn how the Canadian Association of Emergency Physicians (CAEP) successfully leveraged NetForum's optimized adoption.

## Progressed adoption

Should you choose NetForum's progressed adoption?

**Progressed adoption** is perfect for mid-to-large sized organizations who want to beat renewal deadlines and gain a robust AMS.

Maybe your organization wants to start with an out-of-the box AMS solution and add configurations as needed.

Take advantage of implementing NetForum in steps so your staff can access new functionality after each implementation stage, adding configurations and integrations at your own pace.

Not sure which implementation path is right for you?

## Configured adoption

Should you choose NetForum's configured adoption?

**Configured adoption** is perfect for mid-to-large sized organizations who have custom technology needs, a longer runway to reach their goals, and a desire to harness all the revenue-driving robust features of NetForum AMS.

Choose NetForum's configured adoption to exceed your members' expectations and deliver a better user experience by providing your team with all your needed AMS features and functionality.

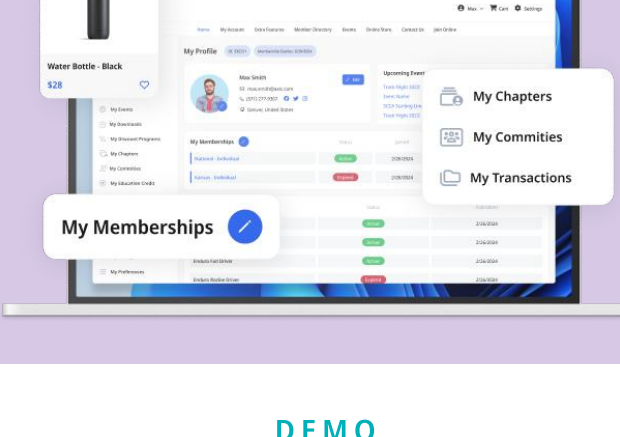

Learn how the American Orthopaedic Association (AOA) successfully leveraged NetForum's configured adoption.
